    Authenticating using the `Azure CLI` is going to be same for WindowsOS too.

    ```
    # Azure CLI Login
    az login

    # List Subscriptions
    az account list

    # Set Specific Subscription (if we have multiple subscriptions)
    az account set --subscription="SUBSCRIPTION_ID"
    ```

- Install [VS Code Editor](#)
- Install [HashiCorp Terraform plugin for VS Code](#)
- Install [Git Client](#)
